COMMON ORTHOPAEDIC CONDITIONS FOR GP EDUCATION PROGRAM

Four of Bethesda Health Care's key orthopaedic surgeons will be presenting the next topic at the popular General Practitioner (GP) Education program on Thursday 16 June from 6:30pm in the hospital cafe.

Entitled 'Diagnosis and treatment of common orthopaedic conditions and injuries', this session will be presented by orthopaedic surgeons Drs Ben Hewitt, Travis Falconer, Ross Radic and Anthony Liddell.

Topics that will be discussed :

- Management of wrist and elbow injuries
- Knee arthritis - management and treatment options
- Management of shoulder instability
- Management of knee ligament injuries

Orthopaedics is a popular topic for GP's and this specialty is regularly included the Bethesda Health Care GP Education Program, now in its fourth year.

The remaining 2016 program will incorporate presentations on breast cancer and palliative care, as well as an additional orthopaedic surgery session.

For GP Education Program event enquiries or to be placed on the Bethesda Health Care GP database, email rsvp@bethesda.org.au or phone 9340 6396.

Bethesda Health Care is an independent 88-bed award-winning hospital in Claremont who has been providing care and service to the Western Australian community for more than 70 years.
